My dream gaming computer room build: Project Wolf-Clan

Project (Wolf-Clan) outline

Purpose: Top end Extreme Gaming, 3D, 2D, & Video Editing; with a Mobile Gaming machine
So I could take it to LAN parties. Side Note, my Spouse will automatically get a sweet set up like this but to her own preferences. When the young ones (Kids) have proven them selves worthy for such set ups they will be able to have a set up like it which it will also be to their own preferences as well. Till then the Young Ones will be with what I give them for Computing technology for School and light gaming.

Please do note that this is a Multi Computer Set up complete with a server and other things.

Priorities:
1. Extreme Hard Core Gaming
2. 2D, 3D and Video Editing
3. Entertainment
4. School Work.
5. Business Management

Furniture priorities:
1. Safe and sturdy
2. Comfortable and ergonomic
3. Convenient ease of access
4. Sophistication.
5. Something that the Young Ones can grow in to.

Overall Priorities:
1. Safety and security
2. "WOW Factor"
3. Maximized Convenience and Recreation
4. With the server the Internet experience could be a better experience.
5. Make life easier for me and my family.

**********Main Towers**********

----------Primary Gaming Rig. (Wolf Pack)----------
"This Build is the primary Gaming Rig."

Main Parts:

Case:
Thermaltake chaser MK 1 full tower gaming case.

Motherboard:
ASUS Rampage IV Extreme LGA 2011 Intel X79 SATA 6Gb/s USB 3.0 Extended ATX Intel Motherboard

CPU:
Intel Core i7-3960X Extreme Edition Sandy Bridge-E 3.3GHz (3.9GHz Turbo) LGA 2011 130W Six-Core Desktop Processor

CPU Cooling: (For Just in Case)
Thermaltake CLP0575 Frio OCK Universal CPU Cooler Ultimate OverClocking King Intel LGA-2011

Memory (RAM): (There will be two of these which yes I know I will have extra fans)
G.SKILL Ripjaws Z Series 32GB (4 x 8GB) 240-Pin DDR3 SDRAM DDR3 2400 (PC3 19200) Desktop Memory Model

Memory Cooling: (There will be two of these for in case I can use them with the G-Skills and want to change them out every now and then.)
CORSAIR CMXAF1 Fans

Ram accessory: (There will be two of these)
Corsair CMXAFPRO AirFlow PRO LED Memory Activity Monitor

Power Supply Unit: (x1 The amount of these Power Supply's I would be using.)
CORSAIR AX1200i 1200W ATX12V v2.31 and EPS 2.92 SLI Ready CrossFire Ready 80 PLUS PLATINUM Certified Full Modular Active PFC Power Supply

Sound card: (Will not use right away due to limitations of the expansion slot's on the motherboard but will use in future overhauling of the Gaming rig)
HT | OMEGA CLARO II 7.1 Channels 24-bit 192KHz PCI Interface Sound Card

Video Card:
EVGA GeForce GTX 680 SC (x3 The amount of these Video Cards I would be using.)

Optical Drive:
Lite-On iHBS212-08 12X Internal Blu-Ray Writer

Extra Fans:
>200 x 200 x 30 mm Colorshift Top Fan
>200 x 200 x 30 mm Colorshift Side Fan
>120 x 120 x 25 mm Clear Bottom Fan
>The Memory cooling fan from the Ram kit

Fan Controller:
Aerocool X-Vision Fan and Temperature Controller

Flash Media Reader:
NZXT Aperture M Media Reader

Primary Hard Drives: (x2 One for Operating system the other for Programs and Games)
Seagate ST95005620AS Momentus XT 500GB Solid State Hybrid Drive

Secondary Internal Hard Drives: (Data Storage for Pictures, Music, movies, and such)
2x Western Digital WD2002FAEX Caviar Black Hard Drive - 2TB, 3.5", SATA 6Gbps

Operating System (OS):
Microsoft Windows 7 Ultimate 64 Bit

Anti-virus, Anti-malware, Anti-spyware, firewall, program:
Advast Internet Security Platinum. 3 Years 3 PC's

Other parts:

Blue, Red, and Green; Cathode Tubes lighting.

3D Editor:
Maya 3D (The Works with eVeRyTHiNG included with it!)

2D Editor:
Photoshop (The Best one out there)

----------Secondary Gaming Rig (Wolf Hunter)----------
"This build is with a Different case, fans, and fan controller."

Main Parts:

Case:
Cooler Master HAF X Full Tower Case

Motherboard:
ASUS Rampage IV Extreme LGA 2011 Intel X79 SATA 6Gb/s USB 3.0 Extended ATX Intel Motherboard

CPU:
Intel Core i7-3960X Extreme Edition Sandy Bridge-E 3.3GHz (3.9GHz Turbo) LGA 2011 130W Six-Core Desktop Processor

CPU Cooling: (For Just in Case)

- Enough internal components to build Wolf Scout 16 times over

So that way my family could have some sweet overhauled computers

- Front bezel and expansion cover same as what is on Wolf Ghost.
- Room fans
- Various Game posters to hang on the walls
- Dart board and darts
- Wall Paintings

With closing, I do hope that you have enjoyed pouring through this list as much as I have putting this list of parts and such together. Yes there is also stuff for around the house and such which yes I do wish to start a family and a home patterned after the family that I grew up in.

-Alexander J. Cooley

This down below is how the set up was before I decided to go with the Intel Motherboard and CPU chip stuff which is to show you for evolution purposes and such. How ever if I could do a side by side comparison of the two set ups I would be doing such. Mind I tell you that this is also a Multi Computer Set up that is meant for the items that is mentioned on the first page of this all. On the next page you will see what I am talking about. Take note that these ones are AMD builds.

Again Thanks for taking your time to look even further in to this parts lay out that I am wanting to have. Please note for Wolf Den and Ghost Wolf I am intending on using the original cases that the manufacture made for them. I am wanting to give those cases one last build before they get retired completely. How ever if I am going to be building one in to a new case then I am going to have these two cases to keep them identifiable. It has also trotted across my mind that they are going to need some memory card readers so with that I have found something suitable for both cases.

This part is added Aug 19 2012

After looking up the Cooler Master Haf X on New Egg I have found that there is also a blue edition which I am finding my self to want to make Wolf Hunter not only in the Red edition but also in the Blue edition with all the peripherals included as well. But the Blue editions will be called “Wolf Moon”

Wolf Den:

Media Card Reader:
nMEDIAPC ZE-C198 All-in-one USB Card Reader with USB 3.0/IEEE 1394/e-SATA Port/HD Audio Ports
Ghost Wolf:
APEX TX-519-35 Black Steel MicroATX Mid Tower Computer Case 350W Power Supply

Media Card Reader:
nMEDIAPC ZE-C198 All-in-one USB Card Reader with USB 3.0/IEEE 1394/e-SATA Port/HD Audio Ports

Thanks for reading this Dream Multi PC set up list. Please note that there are more than one of each part requested and the parts are laid out for the convenience and ease of reading and understanding.

All the best!
